Onduline EASYLINE sheets are lightweight, easy to handle and fix and their size is perfectly suited to any small timber framed building.

**Designed for easy fixing**

**EASYLINE benefits:**
- Easy to cut, shape and fix
- Attractive colours and appearance
- Does not rot, rust or become brittle
- Lightweight and durable
- Eco friendly, made from recycled fibres

**Installation**

1. Follow these simple fixing instructions. First determine which specifications below match your building:

- **Pitch of the roof**
  - 5-10°
  - 10-17°
  - 17-26°
  - 26°

- **Distance between the battens (cm)**
  - Full decking: 19, 26, 70
  - 2

- **Number of internal supports**
  - Full decking: 3, 2, 1

- **Effective sheet coverage (m²)**
  - 0.4 m², 0.43 m², 0.53 m², 0.53 m²

- **Number of nails per sheet**
  - 15, 15, 14, 13

2. **Sheets**

   Sheets to be laid in a broken bond pattern to avoid a sheet build up at overlap. Always start your first row below the gutter, leaving minimum 7cm overlap. Begin the second row with half an EASYLINE sheet (cut lengthwise) and carry on with complete sheets. If a third row is required, start it with a complete sheet.

3. **Fixing**

   Sheets must be fixed onto each of their supporting battens by using the nails or screws specially designed for EASYLINE EASYLINE sheets. Nail sheets at every corrugation at the eaves, overlaps, ridges and either side of the vertical joints – see Fig 1. For intermediate purlins as illustrated in Fig 2.

4. **Maintenance**

   To ensure a long life the roof should be cleared of leaves and debris and gutters cleaned regularly. Any branches in contact with the roof surface should be removed.

5. **Technical Note**

   EASYLINE sheets are not classified to External S.A.A fire rating as required in UK Building Regulations for some classes of structure. In these cases they must be fixed on a fully supporting roof deck and the sheets coated with a proprietary AA surface paint treatment applied in accordance with the paint manufacturer’s instructions.
